## Harry Care or Harry Cari

By Leland York

Reminder I am not a Republic-rat or demo-Jackass, or whatever they like to call themselves!

If you are watching the health care fiasco, you know it ended up being Harry Reid's design (alias Harry Care). Let's take a look at how Harry arrived at this point.

I was in Vegas at Christmas watching the tely, and an ad came on stating Harry Reid kept the mob and gangsters out of Vegas — whoa — wait a minute. Remember when Harry was the Attorney General of Nevada and the chairman of the gaming commission. The guy that issues gambling licenses. A known Chicago gangster named Bugsy Seal came to Vegas and bought the Sands Hotel. Nevada law says no unsavory characters or felons can have a gambling license. Harry Reid made it possible for the little gangster to get a license. How, by inviting one of the famous rat pack to buy a small percentage of the Sands — who — "Frank Sinatra" — Frank a famous Italian is rumored to have ties with the mafia. Frank went on doing his thing and Bugsy and his mother got their gam-

### GUEST COMMENTARY

bling license under Sinatra's name and ran the Sands wasn't skimming. Born at the Sands?

Now in Winnemucca, Harry has an ad that he is creating jobs. Wait a minute. Harry Reid, the number one Democrat Senate Majority Leader has two bills sitting on his desk that would allow two clean coal power plants to be built like the two at Valmy. One in Ely — one in Delta, Utah. That would create tens of thousands of good paying jobs in this depressed economy. Valmy uses seven million tons of coal per year, clean coal, producing clean electricity. It appears you could strike a match out at the Valmy Power Plant and have more pollution than comes out of the water vapor scrubbers at Valmy. Fourteen million tons of clean coal would be needed at Ely and Delta. How many thousands of great jobs would that create? How many grocery stores and jobs would it take to feed the power plant employees? How many gallons of gas for their cars? How many new houses to

be built to stimulate the real estate market? How many thousands to build the plants and the residual workers and the money by the millions would flow into Nevada and Utah? When asked why he, Harry Reid will not place the bills into committee, Harry said coal makes you sick, clean coal, and clean electricity. Don't make me sick. Harry Reid makes me sick!

Harry also said the tourists and voters bother his nose and I assume makes him nauseated as Harry said they stink. You can smell the tourists, I assume most are voters, as soon as they come through the doors, to visit their senators from their state and districts. Is that a strange statement or what? How many misrepresentations of the truth and facts do you get before they become the word I with a capital L? Remember when Senator Packwood had a private party in a private home and got a little inebriated, kissed a few older ladies on the neck and patted their behind. "Most of the ladies probably

enjoyed it." Harry Reid came unglued when he heard of the goings on and told Senator Republican Packwood, he should resign or he, Harry Reid would file impeachment papers against him. Senator Packwood resigned.

Then comes Democrat Bill Clinton. You remember the guy who was impeached for lying to congress and trying to make a whore house out of the White House. I talked with Harry on the phone and corresponded with him numerous times about the vote that was soon to come from the Senate and asked Harry not to vote to keep President Clinton in office. Harry finally quit corresponding and had his aides deal with the likes of me.

I reminded Harry about Senator Packwood's party in a private house and President Clinton's entertaining Monica in the United States number one house and number one room, the oval room escapades and their great disparity and seriousness in comparison. To no avail Harry voted to keep the democrat Clinton in office. Is that the epitome of hypocrisy or what?
